-- Gnosis: the mathematical kernel of gnosis
--
-- One formula. Five symbols. Everything.
--  $w_i = R - \min(v_i, R) + 1$ 
-- The God Formula generates the Seven Universal Laws:
-- 1. Impossibility of zero    -  $w_i \geq 1$  (the sliver, the +1, Peano's succ != 0)
-- 2. Strict ordering         - less rejected = more weight
-- 3. Universal sandwich      -  $w_i$  in  $[1, R+1]$ 
-- 4. Cave observation        -  $\text{dims} > \text{channels} \Rightarrow \text{deficit} > 0$ 
-- 5. Conservation           -  $w_i + v_i = R + 1$ 
-- 6. Sorites sharpness       - boundaries are discrete
-- 7. Chain termination       - every chain reaches a fixed point
-- Reduction chain: primator !' clinamen !' sliver !' 7 laws !' 35 predictions !' 350+ theorems
-- Three pillars implement the formula:
-- BuleyeaLogic               - post-fold logic, truth is ground state, Boolean is K=2
-- BuleyeaProbability         - the God Formula, void walking, all seven laws
-- BuleyeaRL                  - rejection-based RL, train on what is NOT
-- Plus the number system and particle model:
-- GnosticNumbers / IrrationalGnostic / Confinement / TenBosons
